

Ashford

Quality & Environmental Policy

Aim: It is the policy of Ashford Colour Press Ltd to improve customer service through more efficient processes and communication while actively protecting the environment.

Ashford Colour Press Ltd is a long established, privately owned, Lithographic and digital printing company specialising in the efficient production of high quality printed materials for educational, journal and media manual sectors.

We have established an integrated management system that focuses on both quality and environmental management and applies, as a catalyst the following standards: ISO 9001 for quality along with ISO 14001 and FSC Chain of Custody to address environmental controls.

Our commitment to our integrated management system ensures:

- Compliance with customer, regulatory and other relevant requirements.
- Identification of objectives relevant to both quality and environmental management
- Implementation of controls that will manage the significant impacts of our activities and support our commitment to protect and enhance the environment
- Adoption of environmental best practice across activities and application of the principles of the waste hierarchy (Reduce, Re-use, Recycle, Recover, Landfill)
- Comply with the FSC (Forest Stewardship Council) Chain of custody requirements and sourcing paper from sustainable sources.

We are committed to continually improving the Integrated Management System and environmental performance through a programme of management audits and reviews to ensure its continued effectiveness.

Our Policy is communicated to our employees, people working for or on our behalf and other interested parties on request. A copy is also available on our website.
